

Slurry Infrastructure Grant – Round 2

Information correct as at 09:00am on 20.10.2023

The grant is available to improve or expand your slurry storage capacity, to reach 6 months capacity (for dairy), and to cover your stores. The grant can be used for slurry stores along with items necessary for the basic functioning of new or expanded stores, such as reception pits. Slurry separators are also included the round 2 of the grant.

Grant funding available

The minimum grant you can apply for is £25,000 and the maximum grant is £250,000. The grant uses reference costs to calculate the maximum grant you could get. When claiming, you will get either the reference cost or 50% of the total invoice costs, whichever is the lower amount.

The full list of grant items and required specifications can be found [HERE](#).

Eligibility

The grant is available for landowners and tenants where the farming system already produces slurry. You cannot get grant funding if you already have 6 months serviceable slurry storage.

Priority

Applications for the grant are scored based on location. Funding has increased compared to round 1 and the priority areas have been expanded. You can view the priority areas using [MAGIC Maps](#). From the table of contents, you should select: Land based schemes, other schemes, slurry infrastructure grant.

Application process

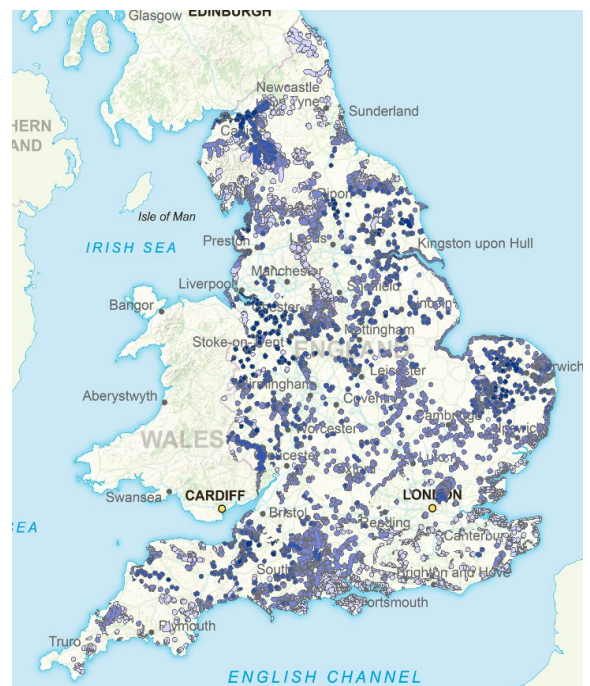

Stage 1: Slurry wizard and Online checker – expected to open in November.

Stage 2: Slurry store location and design assessment - If eligible, you will need to complete a location and design assessment form, ensuring you meet the grant storage requirements and regulations. To be submitted by 30th September 2024.

Stage 3: Full application to be submitted by 27th June 2025.

Full details of the application process can be found [HERE](#).

If your project is not chosen in Round 2, or you are not ready to apply yet, there will be a further round in 2024.
